The new THOK MIG-HT Two souls, one e-bike

The ultimate hybrid e-bike is back: the THOK MIG-HT is once again available in its 2022 version on the [thokbikes.com](https://www.thokbikes.com) website.

An offroad bike that can manage both tracks and the city.

Front-suspended with 29" wheels, fast, sturdy and versatile, the MIG-HT is perfect both in the mountains and on paved roads, thanks to the "Tourer" kit.

THOK launches the 2022 version of the MIG-HT, a bike that combines two souls, a pure offroad soul and a metropolitan soul.

Dedicated to those looking for a versatile e-MTB and who seek high-performing qualities in their bike, the MIG-HT has a SHIMANO E7000 motor with a 504Wh semi-integrated battery, a RockShox Recon RL fork with 120 mm travel, MAXXIS Ikon 29"x2.6 tyres, Sram 200 x 180mm disc brakes, SHIMANO Deore 10v transmission.

The frame is in 6061 T4 T6 aluminium with forged and CNC machined parts and hydroformed tubes with variable thickness. The 504Wh (waterproof) Shimano battery is placed, as is typical of all MIG bikes, under the down tube, to improve handling and lower the centre of gravity. THOK also offers a double cover for this bike: the two covers are shipped as standard with every e-Bike.

The MIG-HT is a top-class e-hardtail with extreme versatility. It can easily handle both single tracks and city traffic. This e-MTB is fun to ride on trails and can swiftly turn into an elegant commuter e-bike, suitable for handling all types of urban environments. This is also thanks to the Tourer kit (available for separate purchase), which includes mudguards, rear luggage rack, lighting system, kickstand and 29"x2.15 Schwalbe road tyres.

It has a very elegant livery, designed by renowned designer Aldo Drudi, which makes it irresistible for those wanting to ride through the city with style or those looking for a front-suspended e-bike that is easy to handle, versatile and responsive, to have fun on trails.

The MIG-HT is already available on the THOK website <https://www.thokbikes.com/thok-mig-ht-ebike> at **€3.390 including VAT**.
